CRA designs and manufactures Multi-Fuel Gas Burners for Boiler and Process heater applications that use fuels such as Natural Gas, Propane, Biogas, LPG, Low BTU gases (blast furnace/coke oven gas) in combination with (LFO) light fuel oils (optional). Our burners offer high efficiency due to low excess air and FGR in conjunction with low emissions with guaranteed NOx, CO, VOC and particulate emission rates. With various installations world over, we guarantee a rugged and highly reliable product with advanced part inclusions such as spark ignited pilots and proprietary Burner Management Systems.

Our portfolio also includes packaged burners that offer turnkey solutions with all necessary standard equipment such as Fuel Train and BMS pre-installed. These systems are compact, safe, reliable, easy to install and maintain.

Applications
- Energy & Heat Supply
- Steel and Metal Production
- Wood Processing
- Food Industry
- Building Materials Industries

Please include the following specifications in your inquiry:
- Project Details
- Gas Composition
- Flow rate
- Temperature
- Pressure
- Required Emission Regulation
- Packaged burner required?
